TALLAHASSEE, Fla. - In an effort to keep Florida residents and visitors safe and aware about the status of the Zika virus, the Florida Department of Health will issue a Zika virus update each week day at 2 p.m. Updates will include a CDC-confirmed Zika case count by county and information to better keep Floridians prepared.

There are two new travel-related cases today in Miami-Dade County. Of the cases confirmed in Florida, 10 are still exhibiting symptoms. According to CDC, symptoms associated with the Zika virus last between seven to 10 days.

CDC recommends that women who are pregnant or thinking of becoming pregnant postpone travel to Zika affected areas. According to CDC guidance, providers should consider testing all pregnant women with a history of travel to a Zika affected area for the virus. CDC recommends that a pregnant woman with a history of Zika virus and her provider should consider additional ultrasounds.

Florida has been monitoring pregnant women with evidence of Zika regardless of symptoms since January. **The total number of pregnant women who have been monitored is 38, with 9 having met the previous CDC case definition.**

County	Number of Cases (all travel related)
Alachua	4
Brevard	3
Broward	24
Clay	2
Collier	2
Escambia	1
Hillsborough	4
Lee	5
Martin	1
Miami-Dade	55
Orange	11
Osceola	6
Palm Beach	10
Pasco	2
Pinellas	4
Polk	3
Santa Rosa	1
Seminole	5
St. Johns	2
Volusia	2
Total cases not involving pregnant women	147

Cases involving pregnant women regardless of symptoms*	38
---	-----------

*Counties of pregnant women will not be shared.

On Feb. 12, Governor Scott directed the State Surgeon General to activate a Zika Virus Information Hotline for current Florida residents and visitors, as well as anyone planning on traveling to Florida in the near future. The hotline, managed by the Department of Health, has assisted 2,053 callers since it launched. The number for the Zika Virus Information Hotline is **1-855-622-6735**.

All cases are travel-associated. There have been no locally-acquired cases of Zika in Florida. For more information on the Zika virus, click [here](#).

The department urges Floridians to drain standing water weekly, no matter how seemingly small. A couple drops of water in a bottle cap can be a breeding location for mosquitoes. Residents and visitors also need to use repellents when enjoying the Florida outdoors.

More Information on DOH action on Zika:

- On Feb. 3, Governor Scott directed the State Surgeon General to issue a Declaration of Public Health Emergency for the counties of residents with travel-associated cases of Zika.
 - There have been 20 counties included in the declaration– Alachua, Brevard, Broward, Clay, Collier, Escambia, Hillsborough, Lee, Martin, Miami-Dade, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk, Santa Rosa, Seminole, St. Johns and Volusia – and will be updated as needed.
- DOH encourages Florida residents and visitors to protect themselves from all mosquito-borne illnesses by draining standing water; covering their skin with repellent and clothing; and covering windows with screens.
- DOH has a robust mosquito-borne illness surveillance system and is working with CDC, the Florida Department of Agriculture and Consumer Services and local county mosquito control boards to ensure that the proper precautions are being taken to protect Florida residents and visitors.
- On April 6, Governor Rick Scott and Interim State Surgeon General Dr. Celeste Philip hosted a conference call with Florida Mosquito Control Districts to discuss ongoing preparations to fight the possible spread of the Zika virus in Florida. There were 74 attendees on the call.
- On May 11, Governor Scott met with federal leaders on the importance of preparing for Zika as we would a hurricane. Governor Scott requested 5,000 Zika preparedness kits from HHS Secretary Sylvia Burwell as well as a plan from FEMA on how resources will be allocated to states in the event an emergency is declared.
- On June 1, Governor Scott requested for President Obama to provide preparedness items needed in order to increase Florida’s capacity to be ready when Zika becomes mosquito-borne in our state.
- On June 9, Governor Scott spoke with Health and Human Services Secretary Sylvia Burwell and Centers for Diseases Control (CDC) Director Dr. Tom Frieden on Zika preparedness and reiterated the requests that he has continued to make to the federal government to prepare for the Zika virus once it becomes mosquito-borne in Florida. Governor Scott also requested that the CDC provide an additional 1,300 Zika antibody tests to Florida to allow individuals, especially pregnant women and new mothers, to see if they ever had the Zika virus.
- Florida currently has the capacity to test 5,885 people for active Zika virus and 1,674 for Zika antibodies.

Federal Guidance on Zika:

- According to CDC, Zika illness is generally mild with a rash, fever and joint pain. CDC researchers have concluded that Zika virus is a cause of microcephaly and other birth defects.
- The FDA released guidance regarding donor screening, deferral and product management to reduce the risk of transfusion-transmission of Zika virus. Additional information is available on the FDA website [here](#).
- CDC has put out [guidance](#) related to the sexual transmission of the Zika virus. This includes CDC recommendation that if you have traveled to a country with local transmission of Zika you should abstain from unprotected sex.
- Based on CDC [guidance](#) released, DOH will now report pregnant women with evidence of Zika virus regardless of symptoms. Prior to new guidance, CDC guidance was only to report cases of Zika if the pregnant women was symptomatic.
